

# 100Mbps router cannot resolve fiber optic connection

## Overview

To fix this, go into device manager and uninstall the driver and reboot. This should force it to download the newest available from Microsoft, then you should manually update from there using your motherboard's latest network driver that you can get from their website. Mark. When issues like signal loss, slow speeds, or intermittent connectivity arise, systematic troubleshooting is key. Why Do Fiber Networks Fail?

Despite their robustness, fiber networks can fail due to: I have a modem, connected to a switch and one of those switch cables connected into my D-LINK DIR-825 router (Firmware 7. I tested this cable without router and get 300mbps in my desktop, but when I connect the cable in my router, the lan and wifi connections are limited to 100mbps. The FritzBox is capable of 1 Gbit/s itself, even though it is quite old. According to the. □ The discussion revolves around the performance issues experienced with the ASUS RT-AC1200 router, which is unable to deliver speeds exceeding 100Mbps via cable and 30Mbps via WiFi, despite a 300Mbps fiber optic internet connection.
