

# AI plugin independent server

## Overview

Design and build custom plugins tailored to your server's unique needs. No coding. GitHub - tdi/awesome-private-ai: Curated list of tools, frameworks, and resources for running, building, and deploying AI privately — on-prem, air-gapped, or self-hosted. Go from idea to implementation in minutes, not hours or days. Simply tell. MCP gives you everything you'd want in a testbed for AI: a 3D world with physics, a camera view for vision-based tasks, and a bunch of goals you can set like “chop tree,” “craft pickaxe,” or “don't die to skeletons. ” Unlike real-world robotics, there's no hardware to maintain, no random dog to walk. Grant Marketplace access to the local network and install plugins directly to your running IDE Some features of the plugin require a paid subscription. Compatible with IntelliJ IDEA, Android Studio and 13 more Supported Assistants: Junie, Windsurf, Firebender, Cursor, Claude Desktop, Claude Code. Easy MCP AI is the most complete WordPress MCP Server — a remote MCP server built so AI assistants can run your entire site workflow, from content and publishing to SEO research, traffic monitoring, and daily admin, through the Model Context Protocol. It works as an MCP adapter for WordPress. An AI agent plugin is a distributable package that bundles skills, hooks, subagents, commands, and configurations into a single installable unit.
