

Australian Ladder Cable Tray Processing

Overview

This manual is designed to guide workers through the detailed production process of ladder cable trays, including the manufacture of horizontal elbows, tees, crosses, reducing bends, and vertical bends, with emphasis on precision, safety, and quality control. A cable ladder system comprises of a range of straight lengths as well as different shaped fittings designed to facilitate changing cabling directions or levels easily, without the need to modify any components. Ladders are generally considered to be the strongest products that are available to. EXduro® FRP cable ladder and tray systems are non-conductive, corrosion-resistant and ideal for mineral-processing and industrial plants across Australia. This type of cable tray is effective because the ladder rungs give you easy accessibility to the cables, from the top or bottom.
