

Botswana Maintenance Special Optical Cable G 652D

Overview

They are coated with a dual layer, UV cured acrylate based coating. This enhanced single mode fibre provides improved performance across the entire 1260 nm to 1625 nm wavelength spectrum due to its low attenuation in 1383 nm, the water-peak region. 652 fiber is the most commonly used. 05 dB at 1310 nm and 155 thout tolerances are reference values. Specifications are for product as supplied by Prysmian: any modification or alteration afterward of product may give different result. The information contained within this document must not be copied, reprinted or reproduced. "Leviton is dedicated to designing, developing and manufacturing sustainable high performance structured cabling and specialty cabling solutions. Leviton reserves the right to modify details without notice in. Recommendation ITU-T G. ARTIC ensures a stable quality control system for our cable products through several programs including ISO 9001, ISO 14001 and ROHS.
