

Busway positioning connector

Overview

These flexible connectors allow for busway expansion and contraction on the low voltage spades. Starline Track Busway is an open channel, overhead power distribution system that allows you to move and rearrange power when and where you need it, eliminating the need for electricians and minimizing the risk of costly downtime. Service Entrance Run, Plug-In Type Vertical Riser, Plug-In Type Horizontal Run and Feeder Type Tie Run illustrate the basic systems. Engineered to ensure the safe and efficient distribution of power in industrial, commercial and institutional environments world-wide, Sentron ampacities range. Plug-in units are positioned along the busway length by notches in the busway housing top that accept the mounting hooks of the plug-in unit. After the unit is positioned on the busway, it is allowed to swing down into the plug-in. it breaker/fused switch to the busway market.
