

Cable tray elbow spot welding machine

Overview

This machine adopts multiple-point spot welding with double layer feeding rack. This machine is composed of gantry type support, welding transformer, pneumatic drive device, upper and lower electrodes, electrical control system, cooling system, and PLC operation. The Cable Tray Welding Machine is an advanced piece of industrial equipment designed for the efficient and precise welding of cable trays. Featuring automatic welding, a user-friendly interface, and durable components, this machine is ideal for manufacturing heavy-duty cable trays used in. The DAPU cable tray welding machine uses advanced pneumatic welding technology. It uses a number of the most well-known domestic and international electronic components from Siemens/Panasonic PLC of Germany, Schneider Electric of France, and Panasonic servo motors of Japan, among others. comWhatsapp: +86186 8038 9568Wechat: willsteedContats: Brian ChanCompany: Guangdong Hwashi.
