

# Cable type and specifications for cabling systems

## Overview

Learn the specifications, standards, and features of the coaxial cable, twisted-pair cable, and fiber-optical cable. To connect two or more computers or networking devices in a network, network cables are used. UL is an international d States military use. Mil Spec can also apply to products other than cabl d electronic products. As a European regulation. Flexible cords come in a number of UL and CSA types including SO, SOW, SOOW, SJ, SJO, SJOW, STO and SJTO. For example: S = service, O = oil-resistant jacket, J = junior service (300 volts), W = . This article provides a clear comparison of the three major structured cabling standards for copper networks: ANSI/TIA-568, ISO/IEC 11801, and EN 50173. Run at least 2 cables to every outlet - 4 is recommended if you can afford it. Question: what type of cable to run?

Cat5, Cat5e, Cat6, Cat6A?

- What speed does each type support?

Don't buy anything that. In this article, we'll unpack 10 types of cable - what makes each one tick, where they're used, and why size plays such a big part.
