

Communication Tower Foundation Contract Price

Overview

Transmission tower foundation costs in 2026 range from \$8,000-\$18,000 for 35kV, \$25,000-\$60,000 for 220kV, and up to \$140,000 for 330kV-class structures, while soil conditions can shift civil cost by 18%-65% across regions. Early geotechnical surveys. A communication tower foundation design is the structural blueprint that determines the anchor point of the tower on the ground. Towers are not rooted by only pouring concrete—they require extensive soil analysis, wind loads, types of towers, and seismic activity to determine the necessary. ANS provides efficient, safe, and cost-effective civil and tower construction services, including lines, antennas, and support structures for large wireless carriers, industry-leading tower owners, and major telecom-equipment manufacturers. Specializing in raw land tower builds and co-locations. Upward Broadband LLC, is seeking proposals from qualified contractors for the construction, and management for the site preparation and build of a new communications tower.
