

Disable SSID on Telecom Fiber Optic Router

Overview

Go to your router's settings in a web browser, and navigate to the "Home/Wireless network/WLAN" page. Uncheck the option to broadcast the SSID to hide your network. This makes your Wi-Fi less visible to others, adding a layer of security and reducing unwanted connections. Remember, it's a straightforward. Nowadays, more people are using a Wi-Fi Router instead of the direct Ethernet port to connect their computers and devices to the Internet, as one internet connection can be distributed on multiple devices via a Wi-Fi Router. " However when I click on "Advanced. To improve the security of your network, you can configure your router to hide the SSID, thereby rendering it undetectable. Either ask them to put the router in bridge mode and. Disabling the SSID (Service Set Identifier) of a wireless network is a common practice aimed at enhancing security by making the network invisible to unauthorized devices.
