

Fangda Distribution Box Direct Connection

Overview

Distributor box, application: Standard, connection method: M12 PUSH-PULL female connector / M12 socket, number of slots: 8, number of positions: 5, coding: A, slot assignment: Double, status display: no, Universal; master cable connection: M23 plug-in connection . Distributor box, application: Standard, connection method: M12 PUSH-PULL female connector / M12 socket, number of slots: 8, number of positions: 5, coding: A, slot assignment: Double, status display: no, Universal; master cable connection: M23 plug-in connection . These Distribution Boxes enable decentralized installation of the electronics close to the load. The range of applications extends from pure energy distribution in buildings to building automation and through to industrial plants. SMART DISTRIBUTION BOXES FOR FLEXIBLE BUILDINGS. is a modern enterprise that integrates research and development, production, and sales. Its main products include air valves, oil misters, filters, 10A-5 cylinders, QDC solenoid valves, pressure reducing valves, triple connectors, pressure. Use distributor boxes for quick and clear cabling in the field.
