

Fiber optic cable installed but 100Mbps is not being used in the router

Overview

More than likely the networking cable or equipment you have is 100Mb only. You would have to check your equipment such as router/AP, switch, and Modem to make sure you have equipment capable of outputting a GB connection, same with all of the cables connecting the. After a phone call to BT I was told that an ethernet cable is to blame as they suspected one of the cables was only cat5, limiting it to 100mbps. After swapping in cat5e cables I ran speed tests and found the results to be the same as before. This guide will walk you through diagnosing and resolving common. To fix this, go into device manager and uninstall the driver and reboot. If this is what you are experiencing, follow this article to get it resolved. Mark. Before you write the problem off as fiber-optic cables, you need to check for basic issues that could cause upset but are easily resolved.
