

Fiber optic communication leased broadband

Overview

A leased line is a dedicated, private connection that provides guaranteed bandwidth exclusively to one business, operating on a fibre-optic network with consistent speeds regardless of other users. Unlike traditional broadband that shares capacity amongst multiple users, leased lines offer what's. Leased lines can provide the level of service that they require as it offers a dedicated line with no disruption from other traffic. There are many providers of leased lines and many types of lines available which use a variety of names such as Generic Ethernet Access (GEA), Ethernet First Mile. Symmetrical speeds upto 10Gb/s, industry-leading reliability and expert UK support - helping your business stay connected, productive and ready to scale. Get a resilient, uncontended connection engineered for cloud, collaboration, and data-heavy workloads. The result is faster speeds, greater reliability. Let's compare a leased line to various fibre alternatives.
