

# Germany RoHS Co-packaged Optical 10G

## Overview

The 10G13-SSFPx-L Enhanced Small Form Pluggable SFP+ optical transceiver is RoHS compliant and designed for use in 10 Gigabit Ethernet links up to 10km over a single-mode fiber. It is compliant with SFF 8472, SFP+ MSA SFF-8431, SFP+ MSA SFF-8432, and EN 60825-1. The RoHS2 Directive, 2011/65/EU, restricts the use of lead and other potentially hazardous substances including Cadmium, Mercury Chromium VI, PBBs and PBDEs contained in electrical and electronic products. RoHS limits these substances to 0. 1% or 1,000 ppm (except for cadmium, which is limited to. COMPLIANT WITH 10G ETHERNET AND CPRI Amphenol's 10G SFP+ optical modules include SFP+ AOC. Amphenol's 10G. Use our next-generation AOCs to connect between SFP+ ports, where they provide a lighter and more flexible solution than comparable copper SFP+ direct attach cables (DACs). Can you give us a brief overview about co-packaged optics (CPO)?

What are their advantages. Co Packaged Optics is a type of optoelectronic technology that combines optical components and electronic components into a single package. This technology is used to create a variety of optical systems, such as optical communication systems, optical sensing systems, and optical imaging systems. Co. GIGALIGHT provides the smart box tools for online coding of SFP, XFP, SFP+, QSFP+, and QSFP28 optics, as well as wavelength tuning for 10G tunable XFP/SFP+ optical transceivers.
