

# How to configure the router when changing IP address via fiber optic cable

Grid Cable for marine and offshore applications

## Overview

To set up your router for fiber internet quickly, connect the router to your fiber modem, access the router's settings via a web browser, and input the provided ISP credentials. Make sure to update the firmware, configure Wi-Fi security, and customize your network name for optimal performance. To do this, plug the fiber optic cable into the router's WAN port. Make sure it's long enough to reach comfortably between the two devices. As far as I understand, I need a PPPoE username and password to connect. I never received it from Telekom, as well as Access number (Zugangsnummer). Maybe I'm wrong and the connection. Abstract: This article provides a step-by-step guide on how to configure a Fiber Modem/Router for IP Passthrough mode when it is behind a separate router.
