

# How to connect a fiber optic cable to a converter and then to a router

## An Extensive Library of Self-Developed Products

## Overview

Insert a compatible SFP transceiver into the converter's port, making sure it matches the network's media type and speed. Then, connect one end of the fiber cable to the transceiver and the other to the appropriate port on a switch, router, or another media converter. (., router or switch) to connect to the converter. Multimode mode fiber: used for shorter. In the illustrated setup, each LAN links to a converter, which then transmits via fiber to a paired converter at the remote site—ensuring stable, long-distance connectivity. Converters also come in different types, from copper-to-fiber and fiber-to-fiber to advanced models such as PoE, industrial. In this guide, we'll walk you through how to connect a fiber optic cable to a router safely and efficiently. This comprehensive guide combines industry standards with field-tested practices to ensure you achieve a rock-solid.
