

How to limit the speed of a mobile fiber optic router

Overview

Touch Speed limit, then enable Speed limit and set the maximum upload and download speed for the device, then touch ✓ in the upper right corner to confirm. Connect your computer/phone to the router's Wi-Fi, or connect the computer to the router's LAN port using an. The TP-Link Speed Limit (Bandwidth Control) feature lets you throttle internet speed on a per-device basis — useful for preventing one device from hogging bandwidth or keeping connections fair for everyone in the household. Connect your phone to the router's Wi-Fi network. You'll first need to identify a device's Mac address or the Internet Protocol (IP) address to limit the bandwidth it can use. This. To effectively limit bandwidth per device on your router, access your router's settings and set bandwidth limits or priorities for individual devices. We have used a TP-Link router to demonstrate all the steps here.
