

Industrial switches can be plugged in anywhere

Overview

Industrial switches are not devices that can be used by simply plugging them in. The deployment and configuration of the network require comprehensive consideration of various factors to ensure its stability, security, and efficiency. 60W and 90W Power over Ethernet (PoE) options via PoE injectors. With a short recovery time of under 20. With high-speed 10-GE uplinks, high-wattage PoE options, ultra-low jitter, advanced network security features, and device-to-cloud performance monitoring with the Cisco ThousandEyes agent, these modular switches are your foundation for industrial AI. *DIS-100G series and DIS-300G. There are various network devices such as cables, connectors, switches, media converters, and so on which help build a robust and safe network and facilitate data transfer over a long distance.
