

Inquiry about the price of G 652D long-distance optical cable

Overview

G652D fiber, the most widely deployed single-mode fiber for telecommunications and general infrastructure, has seen prices surge from approximately ¥18 per kilometer in early January 2026 to current levels of ¥85–120 per kilometer—a staggering increase of nearly 650%. At GL FIBER, with 22 years of experience as a leading Chinese source factory for single-mode optical fiber, we are operating at maximum capacity—producing 2,000 KM of G657A2 fiber daily—yet demand continues to outstrip supply. The project involves the procurement of outdoor optical cables of more than ten models, with a. See why G. 652D optical fiber prices surging in 2025–2026, and how should.
