

# Installation of High-Leg Distribution Box Bracket

## Overview

Align electrical box with keyholes provided in BBS Bracket. Screw assembly to metal stud with STS8 screws. Note: Never install non-metallic sheathed cable. Mounting bracket is a flexible structure, which makes it easy to adjust or replace the electrical components. All the components, wires and connections are under the protective cover due to the same height. When it comes to rigid, easy to install electrical box supports, Eaton offers a wide variety of B-Lines series electrical boxes that help reduce installation complexity. From floor-mount to wall-mount box supports, we offer a variety of options to mount just one to up to 4 or 5 boxes, and every. For three-phase four-wire systems used in distribution boxes, the standard wire colors must be followed: Phase A - Yellow, Phase B - Green, Phase C - Red, Neutral wire - Light Blue, Protective Earth wire - Yellow/Green bi-color. The use of Yellow/Green bi-color wire for any other purpose is. ABB's Control Room offering includes a comprehensive range of solutions designed to optimize the operator workspace for critical 24/7 processes across various industries. The control room is considered one of the most critical areas in any facility, impacting daily decision-making and overall. The Power Feed Box is a NEMA enclosure that provides connections for incoming power cables to the Liebert® MBX Busway System. The Power Feed Box is usually the first component to be mounted on a run. Our line construction brackets are engineered to support insulators, service voltage wires, conductors, static wires, and down lead wires, ensuring a stable and secure setup.
