

# Maldives Integrated Power Distribution Box

## Overview

On July 24, 2021, the Maldives Malé Ring Network (Phase I) project, which was contracted by the Northwest Research Institute of Energy China, was fully integrated and put into operation, becoming the highest voltage transmission and transformation project in the Maldives. This distribution cabinet is custom-engineered to handle the dynamic load characteristics of a modern factory assembly line, specifically managing frequent motor start/stop cycles and Variable Frequency Drive (VFD) controls. To ensure absolute safety and operational stability, the system integrates. Nuomak is proud to announce a new cooperation with a client in the Maldives, for whom we have manufactured PS cabinets, MCCBs, and transparent waterproof electrical distribution boxes. These products are specially designed to meet the challenges of high humidity, salt spray, and harsh coastal. On August 31, People's Daily Online published a feature titled "Thousands of Lights, Illuminating the Future," highlighting the Hulhumalé Phase II Island Power Distribution System Project in the Maldives, undertaken by China Machinery Engineering Group Corporation Headquarters (CMEC). Subsequently, in consideration of fulfilling power demand and sustainable economic development, it is worth giving a second. The Ministry of Climate Change, Environment and Energy has awarded contracts to upgrade electricity grids in 19 islands throughout the Maldives. The upgrade project is supported with USD6. Multiple outlet power strips are manufactured in accordance to Maldives standards with agency approvals.
