

NFC distribution box

- ✓ Slow Axis Aligned (0°) - for standard sensing applications
- ✓ Fast Axis Aligned (90°) - for special modulation applications
- ✓ 45° Axis Aligned - for depolarizer applications

Overview

An NFC box is a compact device that enables quick access to digital content via NFC technology. It's ideal for marketing, branding, and customer engagement. Another small piece of software called MFRC522-trigger detects NFC tags with a NFC reader. The global market for NFC business cards and related products is experiencing robust growth, driven by a shift towards digital communication and the increasing demand for contactless solutions in professional networking 5. Users can store links, reviews, or media and share them with a simple tap. The NFC 215 is a popular programmable option on AliExpress. Our flexible distribution boxes enable reliable, decentralized signal transmission and power transmission up to protection class IP67 - wherever passive distribution boxes are required. RFID/NFC tags integrated into boxes, shelves, pallets or shelves enable complete control of the flow of goods - from goods receipt to goods issue Capture: No visual contact. The smallest NFC 101 device is specifically designed to integrate seamlessly with point-of-sale (POS) systems or small NFC readers.
