

New remote power supply model for emergency communication

Overview

The high-performance, compact RP24 is a modular power supply in a 19-inch aluminum chassis, ideal for auxiliary DC power needed for field-deployed radios and other communications equipment in military, industrial automation and emergency response applications. The RP24/RA24 Rugged Power Solution is a comprehensive power system. Emil Björnson,, and Halim Yanikomeroglu The work of F. Björnson is supported by the Swedish Foundation for Strategic Research and the SweWIN Vinnova Competence Center. Accreditation standards recommend CIs to have emergency power supply system (EPSS) in order to form a local microgrid network with backup resources (generation units/renewable resources) in case of sudden power blackouts of main grid supply. Research currently being undertaken by NTT DOCOMO, NTT, and NIPPON CAR SOLUTIONS (NCS) aims to find solutions. In order to deal with various disasters and accidents using rapidly deployable, reliable, efficient, and stable emergency communication networks, all countries in the world are strengthening and improving emergency communication network construction and related technology research.

Emergency Power Supply System for Critical Infrastructures: Design

Seamless recovery and sustained power to critical infrastructures (CIs), after grid failure, is a crucial need arising in disaster scenarios that are increasingly becoming more frequent.

Keeping Communications Alive with EV-Powered Technology

Addressing the issue of getting power to base stations, instead of backup batteries or generators, the research is looking to improve disaster response by using electric vehicles (EVs).

Portable Power Stations for Emergency Management & Disaster Relief

Discover reliable portable power stations for disaster relief, emergency communication, and field hospital power. Essential first responder

Starlink Solutions for Next-Generation Disaster Response

With Starlink Mini at the core, this intelligent solution comes with an advanced network management toolkit and off-grid power supply, expanding possibilities of aid operations. The

Reliable design of communication link for power emergency vehicle ...

In order to establish a reliable power emergency communication network and speed up the efficiency of power rescue, a vehicle-mounted reliable communication link based on Beidou short...

Research, News, and Perspectives | Trend Micro (US)

By spreading through trusted workflows, organizational codebases, and open-source projects, the threat can scale from a single compromise to a broader supply chain risk.
