

Norway QSFP Optical Module EML

Overview

It employs four non-cooled EML lasers with CWDM wavelengths, achieving a single-wave rate of 106.25Gbps based on PAM4 modulation. These signals are multiplexed and coupled into a single-mode fiber (SMF) for transmission, with a maximum transmission distance of up to 2km via SMF. This article briefly introduces the application scenarios of QSFP-DD in data centers—mid-range transmission. The main focus is on four models: FR4/FR8 (2km) and LR4/LR8 (10km). The InnoLight solution is based on the INPHI chipset, the IN010C50 PAM4 DSP, the four GaAs laser driver dies, and a TIA die, all designed by INPHI. Standards: Compliant with IEEE 802.3cu 100GBASE-LR1 for breakout applications. 3V. AscentOptics' QDD-400S431-10CM 400G QSFP-DD PLR4 optical transceiver modules are designed to support 400G Ethernet, suitable for data center links up to 10km over single mode fiber with FEC.
