

# Price of Topology Optical Splitter

## Overview

Modern PLC splitters typically range from \$20 to \$200, with pricing primarily influenced by the splitting ratio (1:2, 1:4, 1:8, 1:16, 1:32, or 1:64), insertion loss specifications, and manufacturing quality. In the backbone of modern Fiber-to-the-Home (FTTH) networks, optical splitters serve as the unsung heroes that enable cost-efficient connectivity for millions of subscribers. By dividing a single optical signal from a central Optical Line Terminal (OLT) into multiple outputs for Optical Network. Fiber optic splitters include PLC type fiber optic splitters and FBT type fiber optic splitters. Available in single mode and multimode with 900 $\mu$ m loose tube fiber or 250 $\mu$ m bare fiber connectorless or any fiber connector or combination: LC, LC/APC, SC, SC/APC, FC, FC/APC. A passive optical splitter, which is an integral part of the PON. It simply splits the light transmitted by the ODU32/optical LN. More Pricing. These passive devices play a vital role in reducing infrastructure costs while. PLC (Planar Lightwave Circuit) Splitter are available for Single-mode fiber in ratio 1:2 to 1:64. With these splitters you can split one fiber core on different fibers, also. At present, there are two types of optical splitters: PLC optical splitter and FBT optical splitter, namely planar lightwave circuit splitter and fused biconical taper splitter. PLC splitter is a micro-optical element type product, which uses photolithography technology to form optical waveguides.
