

Router optical module esfp

Overview

An eSFP module is an SFP module that supports monitoring of voltage, temperature, bias current, transmit optical power, and receive optical power. Sometimes, eSFP is also called SFP. This topic describes the encapsulation types of optical modules on WDM products Small form-factor pluggable (SFP) optical modules are compact, hot-swappable, low-speed optical modules. 67Gbps and 80km transmission distance with SMF. The transceiver consists of three sections: a DFB laser transmitter, a APD photodiode integrated with a trans-impedance preamplifier (TIA) and MCU. The Huawei OSG040N02 is a high-performance optical transition module designed for professionals in need of reliable data transmission over long distances. With its advanced ESFP technology, this single-mode module supports data rates of up to 1. Huawei eSFP-GE-SX-MM850 is Optical Transceiver. 3z, and SFF-8472, so it is suitable for.
