

# Scared of passing by electrical boxes

## Overview

Triggers include outlets, switches, storms, and devices, causing symptoms from mild anxiety to panic. For someone with electrophobia, a light switch, charging cable, wall outlet, extension cord, appliance, or breaker box may trigger far more than caution. It can bring a fast wave of dread, physical panic symptoms, and a strong urge to leave, avoid, or ask someone else to handle the task. Treatment options include CBT, exposure therapy, and medications with high success. I am very scared of electrical systems like transformers, substations, huge power outlets, even smaller things like fuses, electric meters, electrical rooms, and even things like boilers, big electrical coverings. It's making it difficult to live in a house by myself and I constantly fear what I. Electrophobia is a morbid fear of electricity, characterized by irrational thoughts and intense anxiety related to exposure to electrical stimuli. Thanks to it we can prepare to fight or flee to avoid dangerous stimuli. Like many phobias, electrophobia often develops after a traumatic experience involving electricity. Considering that the world is getting more and more technology-dependent and many of these.
