

## Sinovo optical module

### Overview

This optical module is a high-performance module for short-range multi-channel data communications and interconnect applications. It integrates 8 data channels in each direction with 8x25. Each channel can use OM3 fiber to transmit 70m or OM4 fiber to transmit. Sinovo telecom announced new products 400G QSFP-DD SR8 AOC, 400G OSFP SR8 AOC and 100G QSFP56 DR optical modules., limited offer the next generation optical interconnect solutions for datacenter. Each lane can operate at 25. The module converts 4 input channels of 25Gb/s electrical data to 4 channels of LAN WDM optical signals and then multiplexes them into a single channel for 100Gb/s optical transmission. Reversely on the. Shenzhen Sinovo Telecom co. The complete Series of 10G XFP,SFP+,GPON,100G CFP and 40G.
