

# Spectrometer FTB-5240

## Overview

The FTB-5240 is a powerful optical spectrum analyzer (OSA) designed to meet the challenge of DWDM applications. Easily characterize DWDM signals as well as active and passive components with automated tests in the 1250 to 1650 nm range. OSNR has long been recognized as a key performance indicator in wavelength-division multiplexing (WDM) networks, because it provides a multichannel assessment of signal quality in a. Test Equipment Solutions Ltd specialise in the second user sale, rental and distribution of quality test & measurement (T&M) equipment. We stock all major equipment types such as Spectrum Analyzers, Signal Generators, Oscilloscopes, Power Meters, Network Analyzers etc from all the major suppliers. Powerful DWDM Specifications: With excellent ORR, resolution bandwidth, wavelength range and dynamic range, the FTB-5240 OSA provides flexibility and power. This new OSA is the state-of-the-art in portable field equipment.
