

Technical Requirements for Optical Cable Junction Boxes

Overview

Designed and produced according to the communication industry standard YD/T 2150-2010, it integrates the introduction of optical cable (fixing, peeling, protection), optical fiber fusion, and wiring, and independently completes the optical fiber wiring management function. With the increasing digitization and requirement for high-speed networking, the Bartec Technor junction boxes for fiber optic signals performs dependably in the harshest of environments. Applying our proven design found in the TNCN product line, we are able to provide long-term highspeed junctions. 40. FO-VC2 JOINT USE - VERICAL MIDSPAN CLEARANCES 48.
