

# Vertical Flexible Elbow for Cable Tray

## Overview

The 90° Vertical Elbow provides essential support and enables seamless cable management throughout your cable routing system. Class 1: Designed for use with NEMA Classes 12B and 12C cable trays. This elbow effectively narrows the tray width while seamlessly connecting straight sections and fittings for a flawless transition. Refer to the product sheets for more information on product details and compatibility. A structural offset in the sidewall creates strong, mid-span splices. Cable tray accessories: horizontal elbows, vertical elbows, and straight connectors Cable tray accessories, including horizontal elbows, vertical elbows, and straight connectors, are essential components for efficient and secure cable tray installations in various industrial and commercial. Usage: is used to complete the whole project as it is one of the cable tray accessories, that make the cable go through all available space easily as it can go from the high path to lower one, and the opposite, with different directions too. As there are types: ( Vertical 45-In - Vertical 45-Out -.
