

# Where is the round fiber optic port on the router

## Overview

That's the port where a cable will attach to carry data from the fiber optic network to your device. The port on your modem or router should be located on the back or the side. Find a small hole (just the size of the. To connect your fiber optic cable to a router, ensure you have the following: Fiber optic modem (ONT): Most fiber connections require an Optical Network Terminal (ONT), provided by your ISP. Compatible router: Verify that your router supports fiber optic input (look for an SFP or WAN port labeled). This white box connects to a fibre-optic cable that runs to your house and enables you to access our FTTP fibre network for broadband and voice. There are several lights on the ONT, when these lights change colour or flash, it means something is happening. This direct, uninterrupted path is what makes fiber incredibly fast and reliable.
